

Deployment & Documentation

Book a Doctor Healthcare Platform • Folder 6: Final Handoff

Project Lead:	Boya Praveen
Prepared By:	Uppara Ganesh
Project Team:	Boya Praveen, Shaik Baba Fakruddin, Uppara Ganesh, R Sai Ram, Saginala Sushma
Submission Date:	July 2026

Folder 6 Metadata & Project Registry

Registry Parameter	Value Specification
Project Stage	Folder 6 – Deployment & Final Documentation
Primary Objective	Final System Handover, Repository Archiving, Documentation Completion
Final Status	Validated - Project Deployed

1. Deployment Executive Summary

Following the successful completion of the development (Folder 4) and validation (Folder 5) phases, the "Book a Doctor" platform has reached its final deployment readiness. This documentation summarizes the deployment roadmap, ensuring that the platform is structured for production-level hosting and future maintainability.

2. Final Delivery Milestones

Milestone	Completion Status
Repository Archiving	Version control history documented on GitHub.
Production Deployment	Final code deployment ready for environment hosting.
Technical Portfolio	Full six-folder technical documentation complete.

3. Future Maintenance Roadmap

- **Scaling:** Potential for future integration of tele-consultation video modules.
- **Security:** Routine audit cycles for JWT and database access protocols.
- **Feature Updates:** Iterative improvements to search filters and document upload capacity.

4. Folder 6 Final Conclusion

The "Book a Doctor" platform development cycle concludes with this deployment package. The team has successfully transformed the initial ideation into a functional healthcare booking solution.
